***Claim Rejections - 35 USC § 112***

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "hinge means", line 5, "a pair of hinge means", line 6, and "plural hinge means", line 8, are recited. This renders the claim indefinite. Also, "both side ends of the door leaf", lines 6-7, is ambiguous since plural door leaves have been recited.

Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The angle range of 30-60 degrees is not disclosed.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3 are rejected under 35 U.S.C. 10(a) as being unpatentable over Merrill et al '806.

See the stopper 52, and hinge means 19,22, and hinge shaft 25.

Regarding the angle, such is considered to be an obvious design modification. It is unclear if the angle in Merrill et al is 30 degrees but providing such would have been obvious so as to make the door stronger when in the closed position.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dixon et al '628 in view of Merrill et al '806.

Dixon discloses everything, including the chain 84 (which is the equivalent of the recited wire or rope) except the hinge shaft. However, such is a conventional hinge structure as illustrated by Merrill et al at 25. It would have been obvious to replace the hinge structure of Dixon et al with that of Merrill et al to increase the hinge strength.

### ***Response to Arguments***

Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that the newly recited angle is critical to the patentability of the device. However, it is clearly within the skill level of one of ordinary skill in the art to increase this angle to further strengthen the door.

***Allowable Subject Matter***

Claims 2 and 5-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1<sup>st</sup> and 2<sup>nd</sup> paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
